EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Khaled Shami on 10/1/09.

The application has been amended as follows:

In the claims:

In claim 11, line 1, after "A" and before "computer-readable", insert -- non transitory --.

In claim 12, line 1, after "A" and before "computer-readable", insert -- non transitory --.

Allowable Subject Matter

2. Claims 1-46 are allowed over prior art of record. Applicants arguments filed, 8/10/09 with respect to Nakayama, have been considered and are persuasive. Examiner provides newly cited references Yoneda (7,260,619) and Pulley (2004/0210672), which are also in the same field of endeavor as the claimed subject matter.

However, in consideration of Yoneda, the reference does teach that a web page file (i.e., index.html) is updated, either by a user uploading a new file or an operator at the server creating an updated file. Yoneda (col. 6- col. 8), though is different from the claimed subject matter, since the updated content is stored in a file with the original file name, i.e., index.html, whereas the original content is stored in a back-up file with an extension that represents the data & time for the update. Therefore, the file name is not updated to another file name, as required in the claim.

In consideration of Pulley, the DNS server detects when a IP address associated with a particular host 18 has been changed, Para [0059]. As a result, the DNS updates its table with the new IP address of the host. However, similar to the above discussion, the instant reference does not teach that the file name has been changed. Examiner also notes that the two references do not teach that any of the updates or changes to the content or IP address, respectively, occurs as a function of the distribution conditions, as the claims have been amended to recite.
